

Pro-Flex Extractor Crane 4•5•6•7•8 m D.160/200 mm

Sensational Improvement!

Pro-Flex Extractor Crane is equipped with disc-brakes in the vertical friction joints. It is a milestone in the development of extractor arms. Heavy hoods (up to 10 kg) can be handled by the arm and it still retains its position.

Encased external Side-Parallelogram Arms

With the support arms at the side of the tubes you don't risk to brake the hose over the friction joints. Short hoses means less pressure loss and better airflow.

The King of large Areas

Pro-Flex Extractor crane is the optimal solution when you need to cover large work areas. It is not just a stretched out extractor arm. Two ball-bearing mounted horizontal arms with disc-brakes give an excellent horizontal manoeuvrability. The external encased parallelogram arms make the hood extremely easy to move vertically.

High quality Product

Pro-Flex Extractor crane is a high quality product. It has a long strong steel hood to withstand sparks, chemicals and heat. The flat shape around the inlet of the hood gives a directional suction effect which optimizes the suction power. The hose has a smooth inside and is very durable. All parts are laser cut for maximum precision.

	Art. Nr.	Art. Nr. d.160 mm	Art. Nr. d.200 mm
Pro-Flex Extractor Crane 4m (2m+2m)		P-137	P-302
Pro-Flex Extractor Crane 5m (2m+3m)		P-138	P-303
Pro-Flex Extractor Crane 6m (3m+3m)		P-139	P-304
